

The alliance of FICAP MONTAGNE and GLOBE 3T *a complete leisure sport !*

Recently, a new sport has caught on in the mountains: **the all terrain scooter.**

Fun and inexpensive, the all terrain scooter responds perfectly to the need for novelty and diversification of the summer activities in the mountains. A robust, reliable and fun vehicle, it is attractive both to the contemplative nature lovers and to the highly experienced thrill seekers.

FICAP MONTAGNE has allied with the company GLOBE 3T, whose speciality is the design and manufacture of all terrain downhill scooters. This partnership provides to the resorts and parks, wishing to propose new sensations to vacationers: a **complete package of mounting to the descent!**

Effectively, FICAP MONTAGNE has designed the conveyor walkways allowing the sports lovers to climb the mountain easily and GLOBE 3T developed a range of half motor bike scooters for a thrilling descent.

The conveyor walkway FUNBELT® brings one to the summit of the trail with his scooter at a speed of up to 1.2 m/s, without any effort on his part. Thanks to an exceptional adaptability, the FUNBELT® walkways are robust and very easy to maintain.

Qualified with 30 years of experience in the industrial sector and 8 years of accomplishments in the transportation of persons in the heart of the mountains, FICAP MONTAGNE has designed the conveyor belt MOVE UP® ROUGH TOP multi-purpose, due to its high level of adhesion. This conveyor supports slopes of up to 30% and extreme weather conditions.

For the downhill, the EVO scooters, the innovative design provides an incomparable pleasure and sensations of freedom and breathtaking speed! With a very low center of gravity for maximum stability, the EVO scooter is easy to steer. Very stable and safe, it is suited to all.

This year, GLOBE 3T has developed an option to transform the summer version of the EVO scooter into a winter version designed slide down the ski slopes. An unexpected option, the musher sled dogs or perhaps simply a new leisure!
